The mocca.reader can read and write all major card types. It is optimized for range and speed - both for reading and writing the card.

FEATURES AND ADVANTAGES:

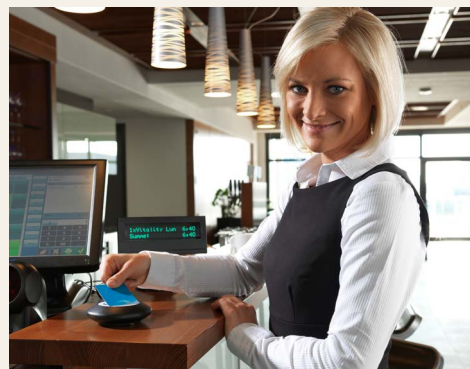

- Improved speed
- Integration of all sort of cards
- Standardized interfaces
- Mifare
- Legic
- NFC
- HiTag
- Nedap
- HID
- ISO 14443 A/B
- ISO 18092

Whether special or standard cards - We have the solution for you!

mocca.reader supports all major card types such as Mifare, Legic, NFC Near Field Communication, Hitag, Nedap, HID and other special reader. Through our own in-house development, we can also integrate your card into mocca.

Optimized for speed and range

The mocca.reader is designed for an optimum flow at the POS terminals. The range of contactless readers and the rapid identification of cards are optimized. So a quick payment and identification can be assured.

Also special requests are fulfilled quickly

Do you already use cards that you do not want to replace? We analyze your cards and include them in our system. Our experts have many years of experience and can tell you immediately what adjustment is necessary or if your card is supported. We fulfill specialist installations for you as well - our development team will find the right solution.
