Where is nocca.touch used?

The POS software nocca.touch is robust, reliable, fast and remains failsafe. Due to the high flexibility of software, it can be adapted exactly to your needs.

It is applied in these different business areas:

- Company catering
- Schools
- Hospitals
- Retirement homes
- Arenas and Stadiums
- Amusement Parks

number of buttons and the selection of special features – all to use with drag and drop, by anyone.

Maximum ease of use and short training

The intuitive touch surface can be operated easily. A short induction session is quite sufficient to train a new employee on the system. All functions are self-explanatory and the often-used items are displayed in a clear structure. The POS screen fits exactly to your requirements: the colours of the products, the size and

Stand alone or in composite

Whether as a single system or large installation nocca.touch remains with good performance and stays fail-safe. Even with a loss of the network infrastructure the payment can be processed without restrictions and with no data loss.

moCCA[®] TOUCH

Cost Center and Order Management

Do you have catering orders, cost centers or room bookings? moCCA.touch lists the applicable cost centers and orders quickly, whether you have 10 or 10.000 orders to manage in your system. The optimized search in moCCA.touch delivers the desired result within a few clicks. Products registered once at checkout are prepared for further billing. Therefore you will save time which you can use for customer service.

Highest data and IT security

The revision security of the POS system moCCA[®] was accredited by Tengelmann Auditing Services & Consulting Munich. The broad review of the specialist for cash audit has proved that the treasury and payment system moCCA[®] is audit proof and suitable to all current safety regulations.

Manage your prices easily

With the help of moCCA.touch you can set your prices several days in advance. This timing of prices results in saving of time and minimizing the administrative complexity. You are able to manage any number of price groups, subsidy models and timed prices. The right price is chosen automatically at checkout. This significantly reduces the workload for personnel and ensures correct registrations at the cashier.
