

## MOCCA® VEND

### THE PERFECT MODULE FOR YOUR VENDING MACHINE

Looking for a payment module for machines with small size and flexible connection? The mocca.vend module is so small that it can be mounted in each machine. Data is transmitted over network (Ethernet or wireless) or with the help of an USB stick.

#### FEATURES AND ADVANTAGES:

- Small dimensions
- Automatic configuration
- Ease of use
- Higher sales
- Integrated deposit billing

#### All types of cards are supported

The mocca.vend vending machine modules support all card types. Whether you prefer to use Mifare, NFC, Legic, Hitag or pay with other contactless cards - the vending machine modules mocca.vend read all the cards.

#### Suitable for all vending machines

mocca.vend is also suitable for small vending machines. The contactless reader and control board are separated. The software configures itself automatically and locates which machine is connected: coffee, beverages, goods, or deposit vending machines.

#### Easy billing – even with cost center cards

The transmission of data is done by USB memory stick, network or WLAN. mocca.vend works offline as well and sends the transaction data automatically to the headquarters, once the connection is established. Since mocca.vend is integrated completely in the mocca system, it is possible to authorize cost center based cards. This enables compensation after consumption.

### Wide range of applications

The moCCA.vend module has already been connected to many vending machine types:

- Coffee machines
- Vending machines for drinks
- Vending machines for snacks
- Deposit billing
- Pizza vending
- Dispensing systems
- and many more...

### Offline und Online

You manage all data from moCCA.vend easily via the central moCCA.admin control system. All personal and transaction data is integrated into the moCCA system. Blocking and new creation of subscribers are easily possible. If you do not have a network connection available, you may transmit the data with a USB stick. moCCA.vend is also available in a pure offline version without moCCA system connection.

### Specifications
